ENVIRONMENT AND PUBLIC HEALTH

This office has been always advised about the administrative duties and responsibilities by working hand in hand with the chairpersons office in order to achieve and to put Kirimanyaga first as our slogan.

The environment office went on to help our resident by cleaning of the spring well known as Kyalimpa spring well with the assistance of the WAR FAMILY FILMS and this was done on 30th – 03 – 2020.

As usual, Homeklin Uganda has continued to help our community in the area by washing away the garbage hence keeping hygiene at standard which was taken as an example to the division level and again Kirimanyaga's slogan came on board.

We also managed to carry out general cleaning of the upper Kirimanyaga (bulungi bwansi) with the assistance of the A B U and this was ministered by them who were our visitors before CORVID 19 .

This office through the environmental protection act has mentioned the collection of plastic bottle from the community in order to avoid burning which causes air pollution and these bottle being passed by the office and well supported and faced by the office administrator.

We have continued on Mr. Harward who constructed in Mayanja channel which has been affecting the community.

Our office through the Municipal Engineering unit went on with the task of deepening, widening the Mayanja Channel and know people with in Kirimanyaga and the neighborhood are known ok. (bebaka kutulo)

We improved this office by solicity the following tools from our stockholders in the area.

- 2 metalic rake and 1 metalic wheelbarrow from Henrob Hospital
- 1metalic wheelbarrow, 1 plastic rake and 1 metalic rake from Mr. Bogere

Mapping and naming of our connecting lanes, closes, crescent were also presented to the Municipal Council for the approval but not yet approved roads suggested in our executive meeting min No 2 dated 10- 10 – 2019.

CHALLENGES

This Office has faced a challenge of the roadside under who always report environmental matters constantly .

We have also faced a big problem of landlords who do not manage the boundary tranches hence damaging the main Mayanja channel
